

CONTROL ROOM

16:9 • OBS 1920x1080 • CONTROL DOCK

- I** Play intro
- W** Wipe between segments
- L** Lower third
- B** Breaking banner
- T** Ticker
- U** Coming up rundown
- Q** Quote card
- S** Be right back
- O** OTS topic box
- 2** Two-box interview
- C** Clear everything

PANEL ONLY

Bug color and LIVE tag, clock, weather and sports slates, safe area, demo backgrounds.

GOOD TO KNOW

Run the show from the D1N dock in OBS. You type in the dock and the program stays clean.

Every card keeps its text beside its own Show button, and the key sits in the gold chip on each card.

Be Right Back is editable. Type any title and subtitle before you press S.

Lower third and Breaking share the lower band; showing one hides the other.

The Weather card takes a backdrop photo. Reset returns the slate.

VERTICAL FRAME

9:16 • OBS 1080x1920 • CONTROL DOCK

- U** Bug on and off
- 1** **2** **3** Globe white, red, black
- K** Clock chip
- B** Breaking strap
- H** Headline strap
- L** Lower third
- G** Safe zone guides
- D** Preview backdrop
- C** Clear everything

GOOD TO KNOW

In a browser it previews the whole frame, scaled, over a demo backdrop with sample graphics on.

In OBS it renders full size and transparent with the panel hidden. Type in its D1N dock and the program updates as you type.

Everything already sits inside the safe area. Press G while framing to see what TikTok and Reels cover, then turn it off.

Backdrop (D) is preview only. Leave it off on air.

THUMBNAIL STUDIO

YOUTUBE 1280x720 • FACEBOOK 1200x630

- 01** Pick a size, a layout, and a scheme.
- 02** Type the tag, the kicker, and the headline. The headline sizes itself to fit.
- 03** Choose a photo. Drag it to place it, scroll to zoom.
- 04** Toggle the YouTube overlay preview to check the timestamp corner.
- 05** Download PNG, or 2X for double resolution.

THE THREE LAYOUTS

Full Bleed. The photo carries the frame; text rides a scrim.

Split. A text panel beside the photo with the slanted crimson divider.

Statement. Type only, with the mark as a watermark. For opinion pieces and announcements.

GOOD TO KNOW

The overlay ghost never exports. Downloads are always clean.

Dark and Light schemes work in every layout, even over photos.

ONE SHOW, THREE OUTPUTS

Go live in 16:9

Control room over the ATEM program feed in OBS.

Clip it vertical

Second OBS profile at 1080x1920 with the vertical frame on top.

Package it

Thumbnail Studio before you publish. One look across every platform.
